The gymSAFE movement screen is specifically designed to assess gymnasts' risk for injury and to also help prevent injuries and conditions commonly associated with gymnasts. Participation is entirely voluntary. Your child will be asked to perform common gymnastic movements while evaluators use the gym SAFE movement screen to assess her movement. After the assessment you and your child will receive a written report of the results of your child's gymSAFE screen. The results will be explained to you by the evaluator. The associated risks are those inherent in normal athletic activity. You are encouraged to ask questions of the screening staff if you do not understand the risks or the procedures to be performed. In addition, the data collected from this screen will help produce a reliable and valid tool for the prevention of injuries & conditions that female gymnasts commonly experience. There are no experimental procedures for this data collection. The data and images collected for the study may be shown at scientific meetings and journals. Please understand your child's participation is voluntary and your child has the right to withdraw her assent or discontinue participation at any time without penalty or loss of benefits to which she is otherwise entitled. Your information in pooled form will be used for research, educational, and statistical purposes so long as the data does not personally identify your child. Questions, Concerns, or Complaints: If you have any questions, concerns or complaints about the gymSAFE screen, its procedures, risks and benefits, you should contact gymSAFE at info@discovergymsafe.org. While not likely, some discomfort may occur while performing the gymSAFE screen movements. My signature / yes indicates that I understand the above.

I hereby consent for my child's image/video resulting from this screen to be used as part of

any advertisement, research, or any other publication related to the gymSAFE screen. I understand that images/video will not be linked to any personally identifiable information without further express consent of the participant's guardian(s).
